- Urethral Catheters

Urethral catheter Nelaton

Features:

1. Tip technology: Gently rounded Cylindrical Nelaton tip using state of the art RF technology for smooth insertion of the catheter.
2. Drainage holes technology: Heat punched / polished, vertically cut soft eyelets that allow the urethral mucosa to slide over the eyelets without being drawn into the lumen during insertion. This minimizes discomfort and the risk of urethral micro trauma.
3. Tube is available in high grade PVC, Phthalate free or polyurethane materials according to customer request. All tube types are produced with the best level of stiffness for patient comfort.
4. The design and stiffness of the connector have been designed to allow perfect collection of urine in a urine bag.
5. The color of the connector indicates the size based on international standards.
6. Finger holes allow primary packaging to be opened easily.
